PROFESSIONAL SUMMARY

- **Experienced Software Engineer** with 10+ years in **PHP** and **MySQL**, including 6 years in **Laravel** and 1 year in **Node.js**, specializing in **ERP** and **eCommerce platforms**.

- Proven expertise in **backend development**, **API integrations**, and designing **scalable microservices-based architectures** for high-performance web applications.

TECHNICAL SKILLS

- **Languages & Programming:** PHP, Node.js, JavaScript, JSON
- **Web Technologies:** Vue.js, jQuery, HTML, CSS3
- **Frameworks:** Laravel, CodeIgniter
- **Architecture & APIs:** RESTful APIs, Microservices Architecture
- **Database & Search:** MySQL, Elasticsearch
- **Version Control & Testing:** GitHub, SVN, Postman, Unit Testing, Code Review
- **Tools & Cloud:** AWS S3, Linode, JIRA, ChatGPT – AI
- **Payment Integrations:** Stripe, PayPal, BillDesk
- **Web Server**: Apache
- **Domain Expertise**: ERP Systems, eCommerce Platforms

PROFESSIONAL EXPERIENCE

Senior Software Engineer at Gravity Cybertech Pvt Ltd| Aug 2025 – Present

- Implemented **microservices-oriented search architecture** using Elasticsearch and Logstash for real-time indexing and advanced search functionalities.

Team Lead - Senior Software Engineer at Sparsh Communications Pvt. Ltd | June 2021 – July 2025

- Designed and implemented **microservices-based architecture** for user management, marketplace, cart, and order modules, improving scalability and maintainability.
- Developed independent RESTful services for key modules enabling modular deployment and easier scaling.
- Conducted **Stripe and PayPal payment integrations**, enabling secure and seamless eCommerce transactions.
- **Leveraged AI for dynamic image generation**, enhancing user experience with personalized and automated visuals.

- Upgraded Laravel frameworks (v5 to v9) and implemented **3D modelling integrations**.
- Optimized code to support **100,000 concurrent users**, improving platform performance.

Delivered tailored solutions with advanced features like multi-currency support and **custom payment integrations**.

Project Manager Avanto Technologies | March 2021 – June 2021

PHP Senior Developer Plum Soft Solutions Pvt. Ltd | July 2012 – February 2021

- Developed ERP solutions for diverse sectors, managing complex modules including HR, Payroll, Inventory, and Finance, which streamlined client operations.

PROJECTS

JoinSmarty: **(Cashback & Rewards Platform) | 08/2025 – Till date**

- Implemented Elasticsearch with Logstash for real-time data indexing and advanced search functionalities.
- Developed and integrated **Twilio-based Two-Factor Authentication (2FA) OTP verification** for secure claim processing.
- Working on **email campaign systems**, including automated triggers, scheduling, and user engagement workflows.

Maisonava: **(E-commerce Platform) | 06/2024 – 07/2025**

- Technologies: Node.js, APIs
- Designed backend using **microservices architecture** with Node.js for handling user activities, marketplace, and order processing.

Ring Builder: **(AI Image Generation) | 2023 – 2024**

- Technologies: PHP, Laravel, APIs for Frontend ReactJS
- Engineered unique image generation with AI (ChatGPT), allowing dynamic jewellery designs based on user prompts, expanding product customization.

Jewel counter: **(E-commerce Platform)** | **2021 – 2023**

Technologies: PHP, Laravel, MySQL

- Developed and maintained a scalable eCommerce platform with modules including User Management, Marketplace, Bespoke Jewellery, Order Management, Pricing Configuration, Multi-Currency, and Job Management.
- Designed and optimized relational database structures, improving query performance and overall system efficiency.
- Refactored monolithic architecture into **loosely coupled service-based modules (microservices-inspired)**, enhancing maintainability and scalability.
- Integrated **Stripe payment gateway**, enabling secure and seamless online transactions.

- Successfully upgraded Laravel framework from version 5 to 9, improving application performance and security.
- Implemented dynamic image generation using **3DM and STL file processing** for customized jewellery designs.
- Utilized **JIRA** for agile project management, task tracking, and sprint planning.
- Conducted **unit testing, code reviews, and deployment processes**, ensuring high code quality and stability.
- Managed infrastructure tasks including **SSL configuration, subdomain setup, and Linode load balancer monitoring**.
- Implemented **multi-cloud media storage solutions** using AWS S3 and Rackspace for scalable asset management.

NSUT ERP: **(University Management System) | 2018 – 2021** Technologies: PHP, MySQL, JavaScript, jQuery & APIs

- Complete Life cycle for Students, Faculty and Staff
- For students Fee Management, Admit card generation, Examinations, Results, Hostel management, course schema.
- Store management, Accounts Finance, HR – Payroll Process, Establishment Section.
- Dynamic sites generations for competitive exams and requirements process.
- Billdesk – SBI payment integration.

IRSM: **(ERP) Indian Road Survey Management | 2016 – 2018**

- Technologies: PHP, MySQL, JavaScript, jQuery & APIs
- Implemented Task Management, Project Management, Inventory Management. HR Module, Accounts Module

Thomson Press: **(ERP) Thomson Press India Limited, Faridabad | 2014 – 2016**

- Technologies: PHP, MySQL, JavaScript, jQuery & APIs
- Implemented Inventory management, Sales, Purchase, Assets management • HR Module, Accounts Module.
- Order Management for digital system.
- Provided IMS Reports, Accounts Ledgers, trail balances etc.
- A unique order management dashboard implemented for front office to check current order status dynamically.

PBL: **(ERP) PBL Transport Corporation Private Ltd | 2012 – 2014**

- Technologies: PHP, MySQL, JavaScript, jQuery & APIs
- Implemented and participated in development and support
- Trip sheet, Sales, Purchase and store management
- Vehicle tracking, HR Payroll

EDUCATION

B.Tech in Computer science and engineering

Aditya Institute of Technology, JNTU-K |2011
